

Hussein Nahal

Full-Stack Developer (MERN)

Email: nahalhussein1000@gmail.com | **Phone:** +961 70 883 675 | **Location:** Beirut

Portfolio: hussein-nahal.vercel.app | **LinkedIn:** linkedin.com/in/hussein-nahal-2011a2343 | **GitHub:** github.com/husseinnahal

Full-Stack MERN Developer with experience building scalable SaaS platforms, dashboards, e-commerce systems, and management applications using Next.js, React.js, Node.js, Express.js, and MongoDB. Experienced in designing and implementing RESTful APIs, authentication systems, role-based access control, and responsive, user-friendly interfaces. Strong focus on performance optimization, clean architecture, and scalable backend systems. Passionate about delivering high-quality, production-ready web applications with modern UI/UX and maintainable code.

Skills

Frontend: React.js, Next.js, JavaScript, Tailwind CSS, Bootstrap, HTML5, CSS3

Backend: Node.js, Express.js, RESTful APIs, Authentication, Role-Based Access Control

Databases: MongoDB, MySQL, SQL

Tools & Platforms: Git, GitHub, Postman

Concepts: MVC Architecture, Responsive Design, SaaS Applications, API Integration

Experience

BrainKets – Front-End Developer Intern

FEBRUARY 2025 – JULY 2025

- Developed responsive dashboard interfaces and reusable components using Next.js and Tailwind CSS.
- Integrated REST APIs and optimized frontend performance to enhance loading speed and overall user experience.
- Collaborated with developers through Git/GitHub workflows and participated in code reviews.

Basma – Freelance Full Stack Developer

DECEMBER 2024 – PRESENT

- Developed full-stack web applications using the MERN stack (MongoDB, Express.js, React.js, Node.js) and Next.js.
 - Designed and built RESTful APIs and managed MongoDB database structures for scalable backend systems.
 - Implemented authentication, role-based access control, and responsive user interfaces.
 - Collaborated with designers and developers to deliver production-ready, scalable web solutions.
-

Projects

AI-Powered Financial Management Platform

MERN STACK (MongoDB, Express.js, Node.js, Next.js), RESTful APIs

- Developed a full-stack AI-powered financial management platform for tracking expenses, savings, debts, and financial performance in real time.
- Integrated AI-powered features for voice-based transaction input, financial analysis, and chatbot interactions.
- Implemented budgeting tools, bill reminders, and debt/savings tracking to help users manage financial goals effectively.
- Built real-time gold and silver asset tracking using live market data to dynamically calculate profit and loss.
- Designed scalable RESTful APIs, secure authentication systems, and responsive user interfaces optimized for production use.

Municipality & Community Management Platform

MERN STACK (MONGODB, EXPRESS.JS, NODE.JS, NEXT.JS), RESTFUL APIS

- Developed a SaaS-based multi-tenant municipality management platform enabling towns and local communities to operate within a centralized digital system.
- Designed a scalable architecture where each municipality has isolated data, users, and administrative control.
- Built dashboards to manage community services including shops, transportation, local services, announcements, and town information.

- Implemented hierarchical role-based access control (RBAC) for platform owners, municipality admins, and store administrators.
- Developed responsive UI and RESTful APIs to ensure smooth interaction between users and municipality services.

FULL-STACK E-COMMERCE & BUSINESS MANAGEMENT SYSTEMS (MULTIPLE PROJECTS)

TECH STACK: MERN STACK (MONGODB, EXPRESS.JS, REACT.JS, NODE.JS, REACT.JS), RESTFUL APIS

Sample Projects: greenlb.com | msdcarsHop.com

- Developed multiple full-stack e-commerce platforms with complete shopping, and admin management systems.
- Built RESTful APIs and database schemas for products, users, orders, inventory, and sales tracking.
- Designed responsive, mobile-friendly user interfaces optimized for performance and user experience.
- Developed a business management system with dashboards for sales, inventory, and customer analytics.
- Integrated reporting and chart-based analytics to support business decision-making and performance tracking.

Education

Bachelor of Computer Science

Islamic University of Lebanon — June 2025
